🧠 Summary

👋 I'm a **Full-Stack Web Developer** with **4+ years** of experience building modern reactive web applications: **SPAs, PWAs, Telegram Mini Apps**, iGaming platforms, and complex admin panels / CRMs.

I deliver full-cycle development: from UI/UX and frontend to backend architecture, SQL databases, API integrations, deployment, and server setup. Backend: **NestJS OOP + Clean Architecture, CQRS**. Frontend: **Angular OOP / React FSD** (or simplified FSD).

👨🏻‍💻 Experience

Experience 👨🏻‍💻	Setup	Year(s)
💻 **Frontend** *(Landings, SPA, PWA,eCommerce, CRM,Admin panels,Telegram Apps)*	**HTML, CSS, SCSS, SASS, Less** (Chota, Bulma, Bootstrap, DaisyUI, Hyper, Tailwind — kit/blocks/grids, Animate, AOS, ScrollReveal, GSAP)	4 years
	JavaScript Type Script and frameworks: **– Angular 15+ / React** (RxJS, NgRx, NgForms, Taiga UI, Angular Material, Tailwind, DaisyUI) **– Vue 3** (Pinia, Vuetify, Tailwind, DaisyUI)	3 years
🛠️ **Backend**	**Node.js Type Script :** NestJS (OOP, Clean Architecture, CQRS), Fastify (TypeORM, Prisma, REST APIs, WebSocket, GraphQl) **Python:** FastAPI, Selenium, SQLAlchemy (simple servers) **DBs:** PostgreSQL, MySQL, MongoDB, Firebase, Cloudflare D1 **Telegram:** Telegraf.js, Bot API, Mini Apps (TWA)	1.5 years
🚀 **DevOps & Hosting**	**Server Setup:** Linux (Ubuntu, Debian), VPS/VDS — Nginx, Apache, Docker, Docker Compose, PM2, SSL/HTTPS, firewall (ufw), SSH **Cloud & Deploy:** Cloudflare (DNS, Workers, D1, Pages), CI/CD, Netlify, Vercel, Heroku, Ngrok	2 years
🔌**Marketing**	Google Analytics, GTM, Meta API, TikTok API, SMTP Brevo API, Mailtrap.io	1.5 years
🧠 **AI-focus**	Developed **Python FastAPI-based** backends/microservices that call external LLM APIs for real-time AI features (chat, generation, analysis). **GroqAPI** — tool for client apps: fast content generation, user responses, low-latency chat completions (prompts, streaming, rate limiting). **CLI tools for dev & server tasks**: Claude (Anthropic Pro) — code gen, debugging, configs/scripts. Google Gemini — analysis, long-context, image/PDF processing. Qwen — coding help, multilingual experiments (free/high tiers). **OpenClaw.ai** — self-hosted AI agent on servers: task automation, local tools, file/email/calendar management, Telegram integration.	1.5 years

💼 Professional Experience — 3 teams

- **ABMcloud**: sales automation, 200+ employees, team of 11
- **art-pixel.shop** · **art-pixel.studio** · **find-iq.com** · **techno-bunker.com.ua** :
  E-commerce OpenCart, team of 20
- **Media Marketing Agency (iGaming)**: 1800+ employees, team of 27 — current

🛠️ Details about experience

Media Marketing Agency (iGaming)

FullStack Engineer | *March 2024 – Present* | *Full-time remote*

✅ **Setup:**

Front-End: HTML, SCSS, JavaScript, Tailwind (Angular OOP + FSD, Vue 3)
Telegram: Telegraf.js (Bot API), Telegram Mini Apps
Backend: Node.js (NestJS — OOP + Clean Arch + CQRS, Express, Fastify), Python (FastAPI, Selenium)
Database: MySQL, PostgreSQL, MongoDB, Google Firebase
Data & Analytics: Google Analytics, GTM, Meta API, TikTok API, Keitaro Tracker, SMTP/Brevo

✅ **Responsible:**

🧩 Full-Stack Web Development (Angular / Vue + NestJS / PostgreSQL)

- Built high-performance SPAs and PWAs using Angular and Vue.js with NestJS backends and relational databases.
- Developed complete solutions from scratch: dynamic frontend, secure backend, admin panels, integrated databases.
- Delivered iGaming platforms and client-facing tools optimized for responsiveness, stability, and user engagement.
- Backend architecture: NestJS with OOP + Clean Architecture, CQRS patterns, DDD elements.
- Frontend architecture: Angular with OOP + FSD (Feature-Sliced Design) or simplified FSD.

🤖 Telegram Bots & Mini Apps (NestJS / SQL)

- Developed Telegram bots and Mini Apps with real-time interaction and Angular admin panels for content management.
- Used NestJS and Python to automate workflows, manage data, and provide analytics-ready structured info.

🧠 Data Collection & Automation (NestJS / Python / SQL)

- Built backend systems for automated data collection, parsing, and structured storage.
- Integrated external APIs (Google, Meta, TikTok, SMTP, Keitaro) into microservice architecture.
- Designed orchestrators for user registration/verification flows across multiple servers and providers (fingerprint, betting platform APIs).
- Built email chain systems: single sends, delayed sequences, dynamic content, multi-tenant templates.

⚙️ DevOps & Infrastructure

- Deployed and maintained VPS/VDS servers (Ubuntu/Debian): Nginx, Apache, Docker, PM2, SSL, Cloudflare.
- Security: firewall (ufw), SSH hardening, rate limiting, DDoS protection via Cloudflare.
- CI/CD pipelines for Angular/Vue/React SPAs and NestJS/Node/Python backends.
- Administered PostgreSQL and MySQL databases: backups, indexes, performance tuning.

Art-Pixel Studio · iFind · Techno-Bunker

Frontend Web Developer | *January 2023 – March 2024* | *Full-Time Remote*

✅ **About:** Developing e-commerce web products, B2B portals, marketplaces on OpenCart, corporate websites on WordPress / Odoo.

✅ **Setup:**
Front-End: HTML, CSS, JS (jQuery, Vanilla, Bootstrap, MaterializeUI, UIkit, Bulma, Swiper.js, Animate.js, ScrollReveal)
Backend: PHP (WordPress), OpenCart (B2C/B2B marketplace), WordPress, Joomla CMS
Database: MySQL

✅ **Responsible:**

- Designed and developed responsive web interfaces using HTML, SCSS/SASS, and JS, cross-browser compatibility, WCAG.
- Contributed to WordPress projects: custom PHP functionalities, theme modifications, plugin integrations.
- Delivered 50+ commercial production projects (e-commerce, corporate sites, admin panels, bot apps).

ABMcloud IT-Solution

Frontend Developer | *August 2022 – January 2023* | *Full-Time Remote*

✅ **About:** Cloud software for supply chain automation: inventory, transportation, retail, loyalty management.

✅ **Setup:**
Front-End: HTML, CSS, JS (jQuery, Vanilla, Bootstrap, Bulma, Swiper.js, Animate.js, ScrollReveal)
Angular — UI components for B2B e-commerce platform

✅ **Responsible:**

- Developed adaptive landing pages for marketing campaigns with pixel-perfect UI.
- Created responsive email templates optimized for Gmail, Outlook, and Apple Mail.
- Built reusable UI components for the B2B platform using Angular.
- Maintained design system consistency, accessibility (WCAG), and cross-browser support.

🗂️ Project cases single dev

Case 1: Quiz Platform + Email Chain Microservices

Stack: *Angular · NestJS (×2) · PostgreSQL · Brevo SMTP · Ubuntu VPS*

- **Client SPA:** quiz flow, email-code verification, result delivery, static pages.
- **Admin Panel:** quiz CRUD, image upload to own server, user table, email template + chain editor.
- **Main Server (NestJS):** quiz/user/session API, send verification codes and result emails, trigger email-chain microservice.
- **Email Microservice (NestJS):** delayed sends, email chain sequences. Deployed on Ubuntu: Nginx + PM2 + SSL.

Case 2: Telegram Bot + Admin + Dynamic Voting Sites

Stack: *Angular · NestJS · HonoJS · Cloudflare Workers/D1 · Vue 3 CDN · Node Fastify · MySQL · Ubuntu*

- **Telegram bot (NestJS + Telegraf)**: email verification, push messages, voting, user group segmentation.
- **Angular PWA:** browser version mirroring bot functionality.
- **Admin panel:** bot content editor, push/voting sender, email module with template builder, user segment selector.
- **Dynamic event landing pages** (HonoJS + Cloudflare Workers + D1): countdown timer, registration, voting, email collection.
- **SMTP microservice** (Fastify): Brevo-based verification and sends. Vue 3 CDN client for event data and multi-server voting.

Case 3: Sports Events Platform (React + Admin)

Stack: *React · NestJS · PostgreSQL*

- Email-based auth with personal cabinet redirect; sports events by category (auth-only access).
- Admin: event management, user list, email sends, PWA push, team logo upload, full content editing.

Case 4: Betting / Casino Landings + Registration Orchestrator

Stack: *NestJS (orchestrator) · Node (verification) · Provider API · Fingerprint · Admin panel*

- Seamless-registration landings for betting/slots/casino with redirect to specific provider event via API.

- Orchestrator server coordinating 3 microservices: email verification, provider API registration, user collection.
- Fingerprinting for duplicate protection. Admin panel for user visualization and email campaigns.

😎 Details about me

✔️ Successfully delivered over **50 production commercial projects**, including:

- ✅ E-commerce UI/UX: engaging and user-friendly interfaces for online stores
- ✅ Interactive Websites: with robust admin panels for content management
- ✅ Corporate Solutions: full-stack corporate websites with integrated admin dashboards
- ✅ Bot Applications: Telegram bots with dedicated admin interfaces

✔️ **150+ open-source projects on** GitHub: including pet and personal projects.
✔️ **CodeWars** njbSaab**:** 400+ challenges (njbSaab) · SQLBolt SQL exercises · CS50 (Harvard)
✔️ **600+ competitive programming tasks**: FreeCodeCamp, learn.javascript.ru, GoIT, gromcode.com

Portfolio links (without NDA):

E-commerce: santan.ua · snowmania · goodsushi.if.ua · flarovan.ca · kvitka-if.com · autosezon.ua · thesofa.com.ua · carpathian-flavor.in.ua

Corporate: bakotech.com · ecoculture.biz · santan.ua/bonusnaya-sistema · art-pixel.shop · art-pixel.studio · find-ig.com ·

⚽ About soft skills

- **Strong Communication & Collaboration:** daily stand-ups, client meetings, situation analysis, decision-making facilitation.
- **Adaptability:** highly flexible, quick to adopt new technologies and methodologies.
- **Resilience & Problem-Solving:** methodical approach, composure under pressure, focus on results.
- **Continuous Learning:** passionate about technology, committed to ongoing education and personal growth.

🎓 Education

University of Economics and Law «KROK»
Bachelor's Degree · 2013–2017

Kyiv College of Economics and Management
Associate Degree · 2008–2012

🌍 Languages

🇺🇦 Ukrainian — Native
Russian — Fluent
🇬🇧 English — Intermediate
